Principles to help determine

Fulfillment of Prophecy

NECESSARY: Inspired prophecy must come to pass.

PREFERABLY NEAR: Choose the closest adequate fulfillment.
Note: One still needs to take into consideration that the fulfillment fits the event.

SINGLE: There is one fulfillment and the New Testament is the authority on it.

PROGRESSIVE: A progressive prophecy is a series of successive separate forecasts (3 or more) strung together. They are in chronological order, but there may be gaps in time between the fulfillment of each successive prophecy.

TELESCOPED: Contemporary prophecy (to the prophet) is immediately followed by a long range prediction (usually of the Messianic Kingdom).

CYCLICAL: major parallel passages throughout book - poetic reiterations of the same event.

NON-LITERAL/SPIRITUAL: Prophecies fulfilled in ways we wouldn't have expected.
Note: Remember - the NT interprets the Old.

JESUS

IS THE GOAL OF PROPHECY!
